Authorized for procurement through DoD Supply Chain Only.</li> </ul> <p>2. SAFETY ALERT: CRITICAL LIFE-SAVING ITEM.</p>	<p><b>Counterfeit CAT Tourniquets</b></p>	<p>Message from Defense Logistics Agency outlining problem</p> <p>This letter lists authorized CAT tourniquet distributors</p>
10	 <p><b>Counterfeit CAT Tourniquets</b></p> <p>2. SAFETY ALERT: CRITICAL LIFE-SAVING ITEM.</p> <p>A. REASON: DLA has become aware of similar products manufactured to closely resemble the C-A-Tourniquet® and available for purchase through non-DoD websites. Authorized DoD procurement gateways will supply only the approved commercial part from authorized distributors. These products were first encountered several years ago in a depot in Afghanistan and thought to have been purged from the system. They were then of obvious inferior construction and quite recognizable as a substitute for the real thing. Today the product is very difficult to distinguish from the C-A-Tourniquet® down to duplicate markings and symbols. Although there is no direct evidence against these duplicate products, several reports indicate that they are of inferior design and may cause serious injury or death.</p> <p>B. RECOMMENDED STRATEGY: The above distributors, supplying the Composite Resources product exclusively, are the only authorized source for this device. The FDA regulates this product as a Class 1 device, which means that there is no requirement for a premarket notification application and FDA clearance is not required before marketing the device in the U.S. However, these manufacturers are required to register their establishment with FDA. If you have purchased these devices from any other source, it is recommended that they be suspended from use and replaced by the recommended product. Please report suspended quantities to your logistical supply office.</p> <p>Some examples of non-authorized Internet sources for duplicate product that may be hazardous are: <a href="http://www.world-element.com">www.world-element.com</a>, ID No. EX 159, and <a href="http://www.airsoftglobal.com/product_info.php?products_id=11454">http://www.airsoftglobal.com/product_info.php?products_id=11454</a>, ID EL-ACC-EX159-AG.</p>	<p><b>Counterfeit CAT Tourniquets</b></p>	<p>Fake tourniquets are of inferior design and may not work</p> <p>May be hard to distinguish from real CAT</p>
11	<p><b>CAT (GEN III) vs. F-CAT</b></p> <p><b>Executive Summary</b></p> <p><b>Introduction:</b></p> <ol style="list-style-type: none"> <li>1.
